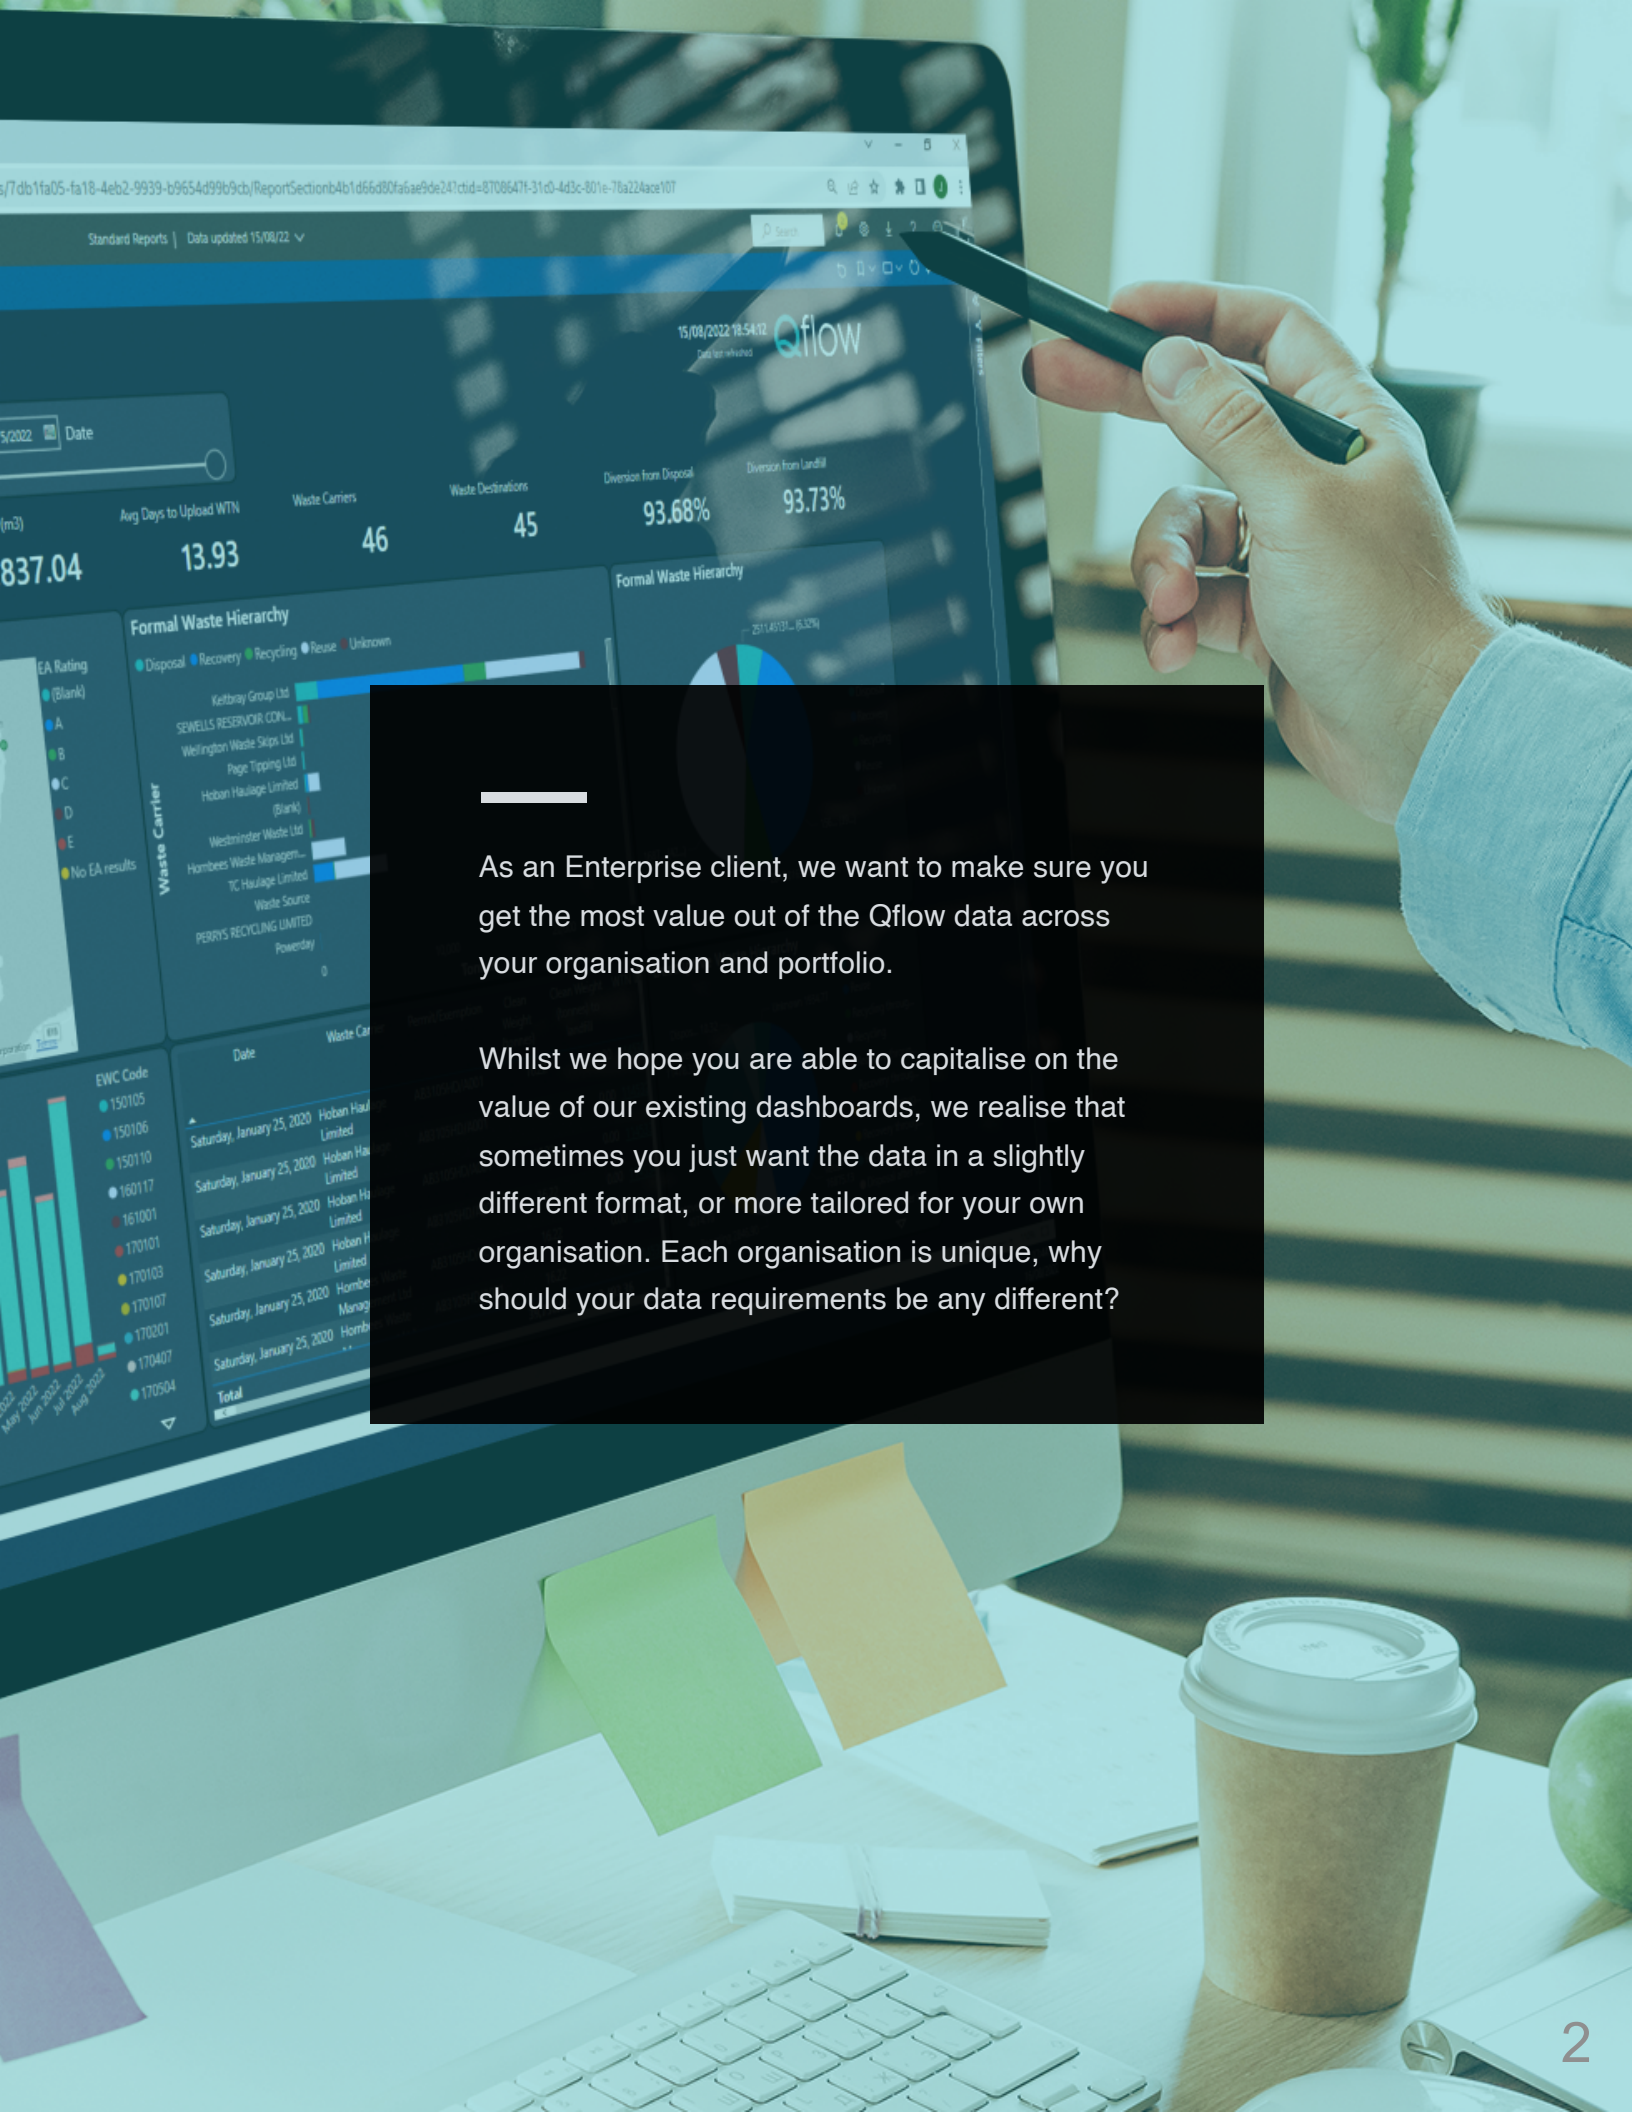
Qflow

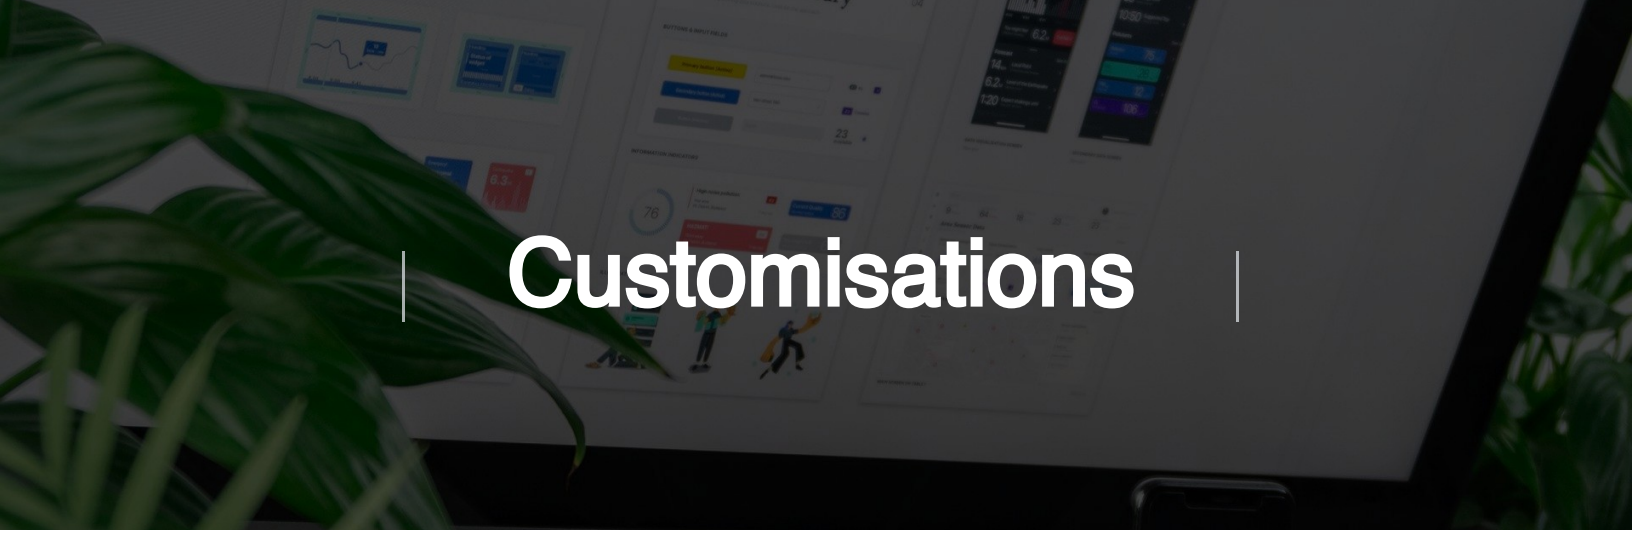
ENTERPRISE

Dashboards



As an Enterprise client, we want to make sure you get the most value out of the Qflow data across your organisation and portfolio.

Whilst we hope you are able to capitalise on the value of our existing dashboards, we realise that sometimes you just want the data in a slightly different format, or more tailored for your own organisation. Each organisation is unique, why should your data requirements be any different?



Customisations

We've compiled a list of customisations we are able to cater for as part of your deployment of Qflow, to enable you to get maximum value from your dashboards.

If you don't see what you're looking for, just ask us and we'll be happy to explore this with you. We can't always promise that we'll be able to complete all requests (we try to incorporate a little bit of magic into our work, but sometimes it's not always possible...), but we'll work with you to find the best solutions for you to move forwards with.

Visual

Changing colours on charts
Rearranging the order of charts and maps

Targets

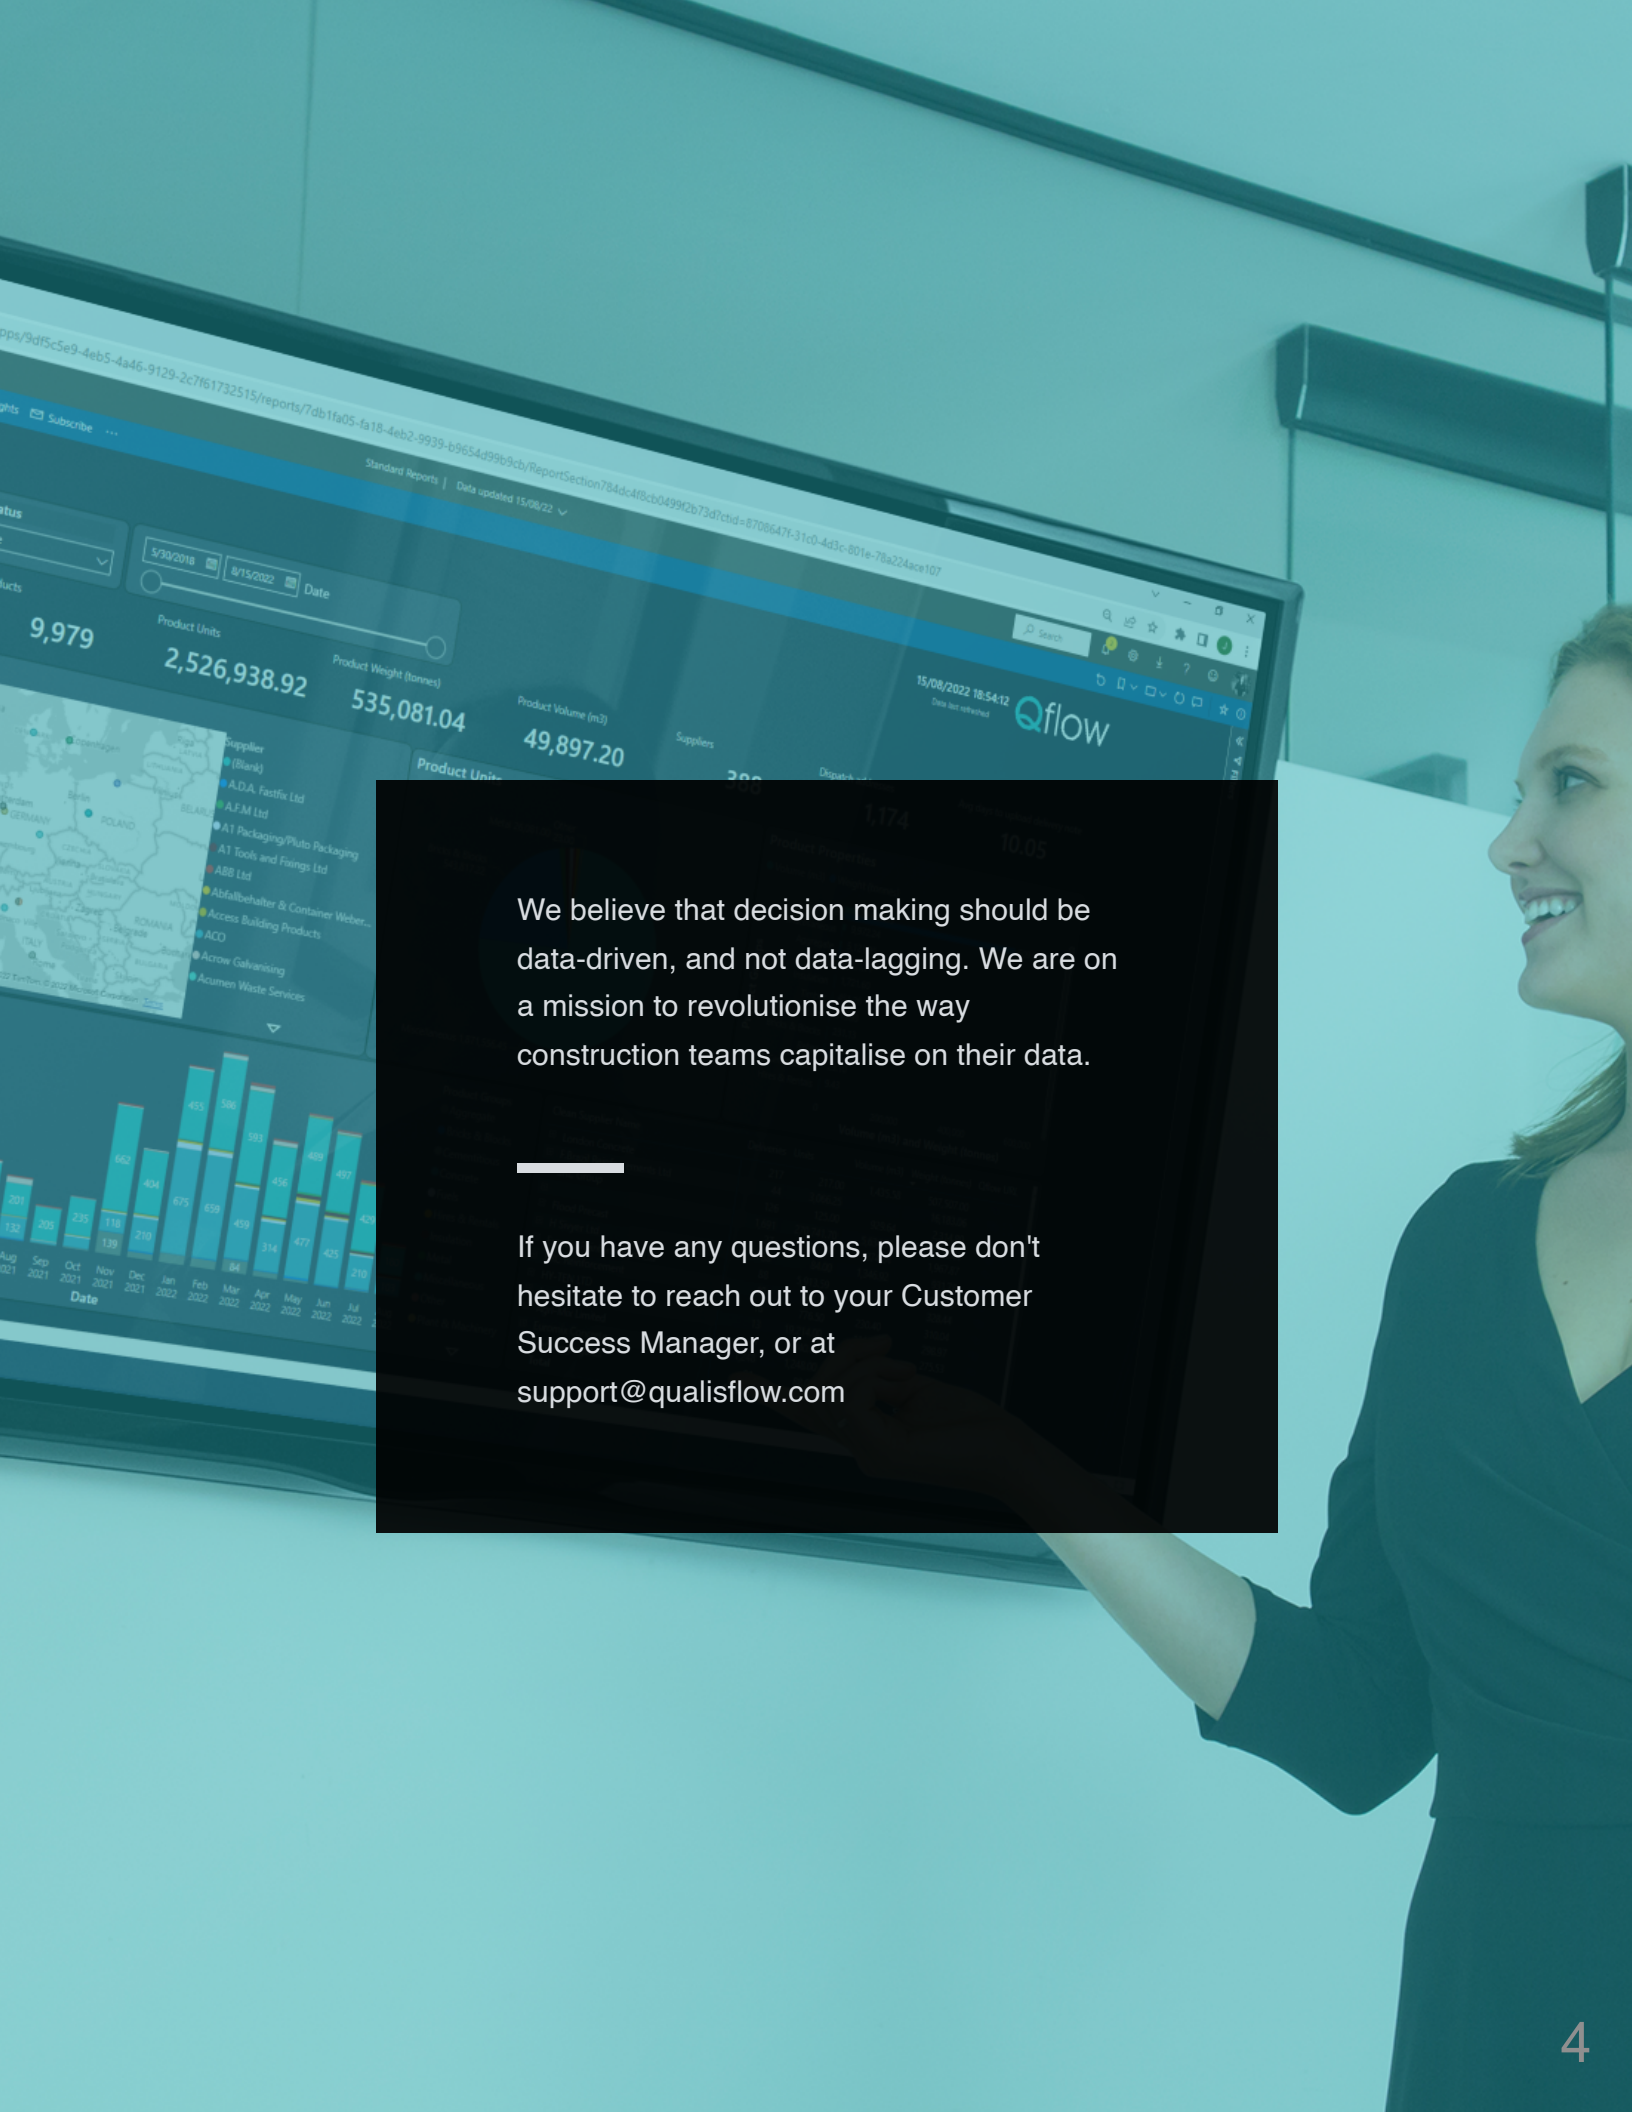
Benchmarking against your sustainability targets

Data groupings

Tagging data, such as by works package, organisation sub-division.

Branding

Adding your desired logo(s)



We believe that decision making should be data-driven, and not data-lagging. We are on a mission to revolutionise the way construction teams capitalise on their data.

If you have any questions, please don't hesitate to reach out to your Customer Success Manager, or at support@qualisflow.com
