

How can Qflow help with PAS 2080

What is PAS2080?

PAS 2080 is a standard for managing carbon in building and infrastructure. It looks at the whole value chain and aims to reduce carbon and cost through intelligent design, construction and use.

Procurement Manager: Prove products arrive as procured (i.e. low carbon certified).

Infrastructure Delivery Manager: Prove correct materials arrive and are installed on site.

Leadership team: Save time and reduce error, get the entire organisation on board.

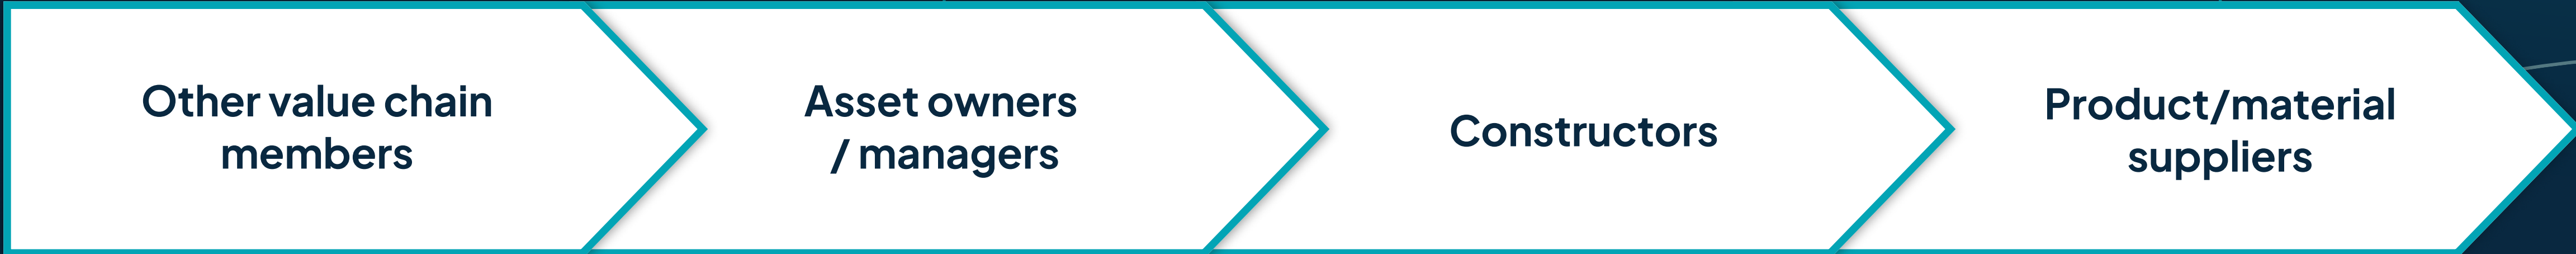

Leadership team: Prove low carbon products are delivered.

Procurement Manager: Prove lower end of the supply chain supplies correct low carbon products.

Value Chain Members

Leadership team: Save time and reduce error, get the entire organisation on board.

Procurement Manager: Ensure orders arrive correctly on site.

Construction Manager: Prove low carbon materials/products.

Construction Manager: Quantify scope 3 and embodied carbon during construction.
